*Based on nine square feet per couple (3' x 3' area).
Ballroom dancing or performances will require additional space

- Easy to transport. Each panel weighs 39.5 lbs. and has two locking screws to secure (tool required, 1/8" allen key).
- All installations must be made on level interior floors, or on clean flat concrete, asphalt or decking.
- Irregular installations, lawn, dirt, and uneven surfaces will require the assembling of a plywood subfloor (1 1/8" t & g), at an additional cost (approx. \$1.35/sq.ft.).
- Severe slopes, holes or obstacles may prohibit installation. All exterior installations must be protected from moisture (weather, sprinklers, etc.)
