

STAGING & PORTABLE PLATFORMS

Each section has a black non-skid surface, and includes six legs for stability. A fixed stairway unit with handrails should be attached to one or two sides of the stage for easy and safe guest access. The 4' x 8' panels can be installed at 16", 24" or 32" height. Skirting is recommended and available in a variety of colors. All installations require an event site with a *solid level floor*, and the customer or contact person present. Exterior installations may require shimming or sub-floor at an additional cost. Prices are estimated, and include installation during WPR business hours. Contact our office for your reservation and custom events.

SIZE	STARTING PRICE at 16" or 24" H
